SPEZIALUHREN ZU FRANKFURT AM MAIN

MODEL T50

THE HIGH-STRENGTH TITANIUM DIVING WATCH
WITH CAPTIVE SAFETY BEZEL.

As of: February 2023

T50: solid, expandable titanium bracelet and folding safety clasp. Warranty 3 years. ø 41 mm (scale: 1:1)

T50: black silicone strap. Warranty 3 years. ø 41 mm (scale: 1:1)

DNV

DNV verifies and certifies the pressure resistance of our **T50** to a diving depth of 500 m and the temperature resistance and functionality in accordance with the European diving equipment standards EN250 and EN14143.

Back and side views. (scale: 1:1)

T50 - luminous design. Colour-differentiated luminous paint for minute hand, second hand and key mark on the bezel for clear reading of set time. (scale: 1:1)

Model T50

The high-strength titanium diving watch with Captive Safety Bezel.

Case made of high-strength titanium, bead-blasted

Tested based on European diving equipment standards and certified by DNV

Waterproof and pressure-resistant to 50 bar (= 500 m water depth), certified by DNV

Captive diver's bezel with guard to prevent accidental misadjustment

Bezel with TEGIMENT Technology and therefore especially scratch-resistant

Colour-differentiated luminous paint for minute hand, second hand and key mark on the bezel for clear reading of set time

Crown at 4 o'clock to prevent pressure on the back of the hand

Ar-Dehumidifying Technology enhances functional reliability and freedom from fogging

Sapphire crystal glass

Resistant to low pressure

Warranty statement for watches.

Masculine design vocabulary with a concept tailored for high operational reliability – that's the concise profile of the T50. A look at its properties shows: with this diver's watch, nothing can go wrong when diving.

Thanks, for example, to the robust safety diver's bezel. It is an extremely reliable tool for time measurement because it is captively attached to the case and secured against unintentional twisting. "Press first, then turn": this is the memorable principle behind the simple yet effective anti-twist mechanism. When things get tough, TEGIMENT Technology ensures exceptional scratch resistance, while Ar-Dehumidifying Technology ensures greater functional reliability and freedom from fogging.

The T50 uncompromisingly embraces clear readability and measurability of time – thanks to a display that has been reduced to the essentials and strikingly large sword hands. In addition, all functions and prints on the dial and safety bezel that are not relevant to the actual dive are visually understated. The timepiece relies on colour-coding to ensure that it can be read reliably, particularly in darkness or under unfavourable conditions. The hour hands and indices on the dial glow green, while the minute and second hands and the main marking on the rotating bezel are bluish.

That a watch as masculine as the T50 feels comfortable in water is probably also because the case and back are made of high-strength titanium. The reasons are clear: high-strength titanium has an exceptionally high salt water resistance and is extremely robust. The high wearing comfort proves to be an added bonus – not least due to the low specific weight and because titanium does not cause allergies. With a diameter of 41 mm, the T50 cuts a wearable figure in any situation - without losing any of its virile design.
