

2300

The skeletonized gold chronograph.

Page 1 / 2
May 2024

- Limited edition to 25 units
- Case made of 18-carat gold, polished
- Exquisitely decorated, skeletonized hand-wound movement
- Sapphire crystal glass
- Transparent case back made of sapphire crystal glass
- Pressure-resistant to 3 bar

The master craftsmanship required to skeletonize a watch is impressively demonstrated with this gold watch. The procedure itself consists of grinding away all extraneous material. However, the skeletonization of this chronograph is a particularly laborious process, as it has a very large number of mechanical parts. The result of this painstakingly fine manual labor is extremely impressive: an artistic golden ornament is created from the various refined components of the watch. Moreover, the skeletonization of this timepiece gives the beholder deep look into the inner workings of its movement, the heart of its mechanics, which performs without end. It is the unimpeded view of the inner workings that first makes the wearer conscious of the true craftsmanship and skill involved in this manual artistry. The gold watch is thus simultaneously the symbol of the way we make our watches: with the utmost precision, intense dedication and loving attention to detail. It is precisely the manual craftsmanship on each individual component that creates the beauty of the entire watch. Right down to the genuine alligator leather strap – naturally with a species protection label – and the perfect, hand-engraved plates.

Technical details

Mechanical Movement

- Valjoux 23
- Exquisitely decorated, skeletonized hand-wound movement
- 17 bearing jewels
- 18,000 semi-oscillations per hour
- Shock resistant as per DIN ISO 1413
