

Watch winder for two watches

Page 1 / 1
May 2024

- After extended time periods without any movement, self-winding watches will need to be wound and readjusted. Watch winders provide an elegant solution. The ZBEW06 model is also suitable for larger or heavier watches. Varying rotational movements are preprogrammed. This watch winder is visually impressive thanks to a modern design, the beautiful details and its high-quality workmanship. A front cover with glass protects the rotors.
- Winner of the 'Excellent Product Design 2020' at the German Design Award
