

1910

The classic pocket watch.

- Savonnette case and chain made of 925/1000 sterling silver
- Individual flat engraving possible on request
- Hand-wound movement, exquisitely decorated
- Guilloché silver electroplated dial

Right from the outset our company made exclusive pocket watches. Collectors remember the "Double Face", or the anniversary pocket watch from 1996 celebrating the company's 35th anniversary which quickly sold-out. With our exclusive pocket watch 1910 we continue with this tradition. Fully in keeping with the period style, it has a traditional hand-wound movement. Its elegant appearance is underlined by the guilloché silver electroplated dial with blue hands and appliqués. The simplicity of the form and the material underscores the watch's classic contours.

The classic pocket watch 1910 is supplied as standard with a pure silver watch cap without engraving. As an optional extra, the watch can be lent a personal touch in the form of a master-crafted flat engraving. This handcrafted and signed engraving turns each and every watch into a unique and distinct timepiece. More information can be found in the "Engraving" section in our catalogue. Please do not hesitate to contact us for individual assistance.
