- Low pressure resistant
- The watch comes in a wooden case with an orange textile strap and mocha-coloured cowhide strap
- Price: 3590,00 €
- Exclusive on armbanduhren-online.de

If you had to choose a wristwatch from our entire collection that exemplifies our company, it would undoubtedly be the 103 series. The pilot chronograph has been a permanent component of our watch range since the mid-1960s.

Since it was launched, our company has introduced many technical innovations, the development of which ARMBANDUHREN magazine has been following for 30 years. That is why we are celebrating this partnership with a limited, special-edition 103 Classic 12 H. This timepiece not only boasts unique features such as Ar-Dehumidifying Technology, which guarantees functional reliability and freedom from fogging, but is also waterproof and pressure-resistant up to 20 bar and resistant to low pressure.

The captive bezel insert of the 103 Classic 12 H is made from hard and therefore scratch-resistant ceramic and features a twelve-hour scale, which can be used to display a second time zone. The chestnut-brown colour of the bezel insert is also reflected in the hollowed-out counters of the subsidiary seconds and the chronograph, which enables short-time measurement up to twelve hours.

The orange stopwatch hands contrast with the dial largely in beige. The hour-, minute- and stopwatch second hand and the attached rhodium-plated appliqués feature luminescent colour.

The integrated, self-winding Sellita SW510 calibre also enables date display between the 4 and 5. A transparent back provides a look at the high-quality mechanical movement and, just like the crystal, is made from anti-reflective sapphire crystal glass. All the 103 Classic 12 H watches feature an engraved limited-edition marking on the rotor.

Launched in 2021 as a limited edition of 600 watches to mark our company's 60th anniversary, the 103 Classic 12 with ceramic rotating bezel promptly sold out.

The 103 Classic 12 H will be an even rarer sight, as the chronograph will be produced as a limited edition of 300 watches for ARMBANDUHREN magazine's 30th anniversary and will come in a double case with an orange textile strap and a mocha-coloured cowhide strap.

Technical details

Mechanical Movement

- SW 510
- Self-winding mechanism
- 27 bearing jewels
- 28,800 semi-oscillations per hour
- Seconds stop function
- Anti-magnetic as per DIN 8309
