103 St Classic C

Exclusive special edition for the specialist watch magazine *Chronos*.

- Exclusive special edition for the specialist watch magazine *Chronos*
- Limited to 200 pieces
- Case made of stainless steel, polished
- 12-hour countdown rotating bezel with luminous key marker
- Shock-resistant acrylic glass
- Solid case back
- Waterproof and pressure-resistant to 20 bar
- Low pressure resistant
- Watch including leather strap, horsehide; brown, contrasting seam white

On the one hand, an eye-catching dial contrast, a matt black anodised, unusual aluminium rotating bezel and a highly domed shock-resistant acrylic glass. On the other hand, technical features such as low pressure resistance, water resistance and pressure resistance up to 20 bar: the 103 St Classic C model effortlessly balances historical design with contemporary technical values.

This special edition, which is limited to 200 pieces, has become a true favourite, thanks primarily to its appearance. Experts classify timepieces such as the 103 St Classic C, which combine black totalizers with a bright – in this case silver-electroplated – dial, as “Panda watches”. The models from the middle of the last century achieved a cult-like status among many watch lovers - also because their striking contrast was entirely in the service of optimised readability.

In terms of construction, the 103 St Classic C achieves this with the symmetrical Tri-Compax division of the totalizers for the subsidiary seconds at nine o’clock, the stopwatch minute at three o’clock and the stopwatch hour at six o’clock. Another important tool for measuring time intervals is the 12-hour countdown rotating bezel with luminous key mark, which rotates in both directions. Speaking of luminescence: for clear readability, even in the dark, the rhodium-plated indices and hour and minute hands are also filled with luminous paint.

A brown horsehide strap with a pin buckle deliberately contrasts the vintage design of the dial in colour and thus completes the iconographic overall appearance of this unique watch.

Technical details

Mechanical Movement

- SW 510
- Self-winding mechanism
- 27 bearing jewels
- 28,800 semi-oscillations per hour
- Seconds stop function
- Anti-magnetic as per DIN 8309

Case

- Case made of stainless steel, polished
- Acrylic glass in front
- Case back screw-fastened
- Crown screwable
- Meet the technical requirements for waterproofness, as set out in standard DIN 8310
- Waterproof and pressure-resistant to 20 bar
- Low pressure resistant

Functions

- Hours, minutes, subsidiary seconds
- Chronograph
- 12-hour countdown bezel with luminous key marker

Dimensions and Weight

- Case diameter: 41 mm
- Band lug width: 20 mm
- Case thickness: 15,9 mm
- Weight without strap: 74 gramme

Dial and Hands

- Silver electroplated dial
- Glossy black counters
- Indices coated with luminescent colour
- Hour Color and minute hand coated with luminescent colour

Warranty

- 2 years
