

206 ARKTIS II

A contemporary take on the traditional diving chronograph.

- Case made of stainless steel, polished / satinized
- Electroplated blue dial, finished with a sunburst decoration
- Tested based on European diving equipment standards and certified by DNV
- Waterproof and pressure-resistant to 300 m diving depth (= 30 bar), certified by DNV
- Ar-Dehumidifying Technology enhances functional reliability and freedom from fogging
- Functionally reliable from -45°C up to $+80^{\circ}\text{C}$
- Captive diver's bezel with minute ratcheting
- Sapphire crystal glass in front
- Transparent back made of sapphire crystal glass
- Low pressure resistant

In 1999, we surprised the watch industry with a special timepiece: the 203 ARKTIS was the first diving chronograph to feature Temperature Resistance Technology. This guarantees the functional reliability of the watch in temperatures ranging from -45°C to $+80^{\circ}\text{C}$. In 2019, this watch will celebrate its 20th anniversary. To mark its initial introduction, we have developed a new edition: the 206 ARKTIS II.

In keeping with its role model, the 206 ARKTIS II features a blue dial with sunburst decoration. To remain as true to the original as possible in other respects, we have also kept the screw push-piece look. Thanks to our D3-System, however, screwable push-pieces are no longer required in the 206 ARKTIS II. This makes the chronograph functions easily accessible and easy to operate.

Model 206 ARKTIS II therefore represents a contemporary take on the traditional 203 series, which is reflected in a new diameter of 43 mm rather than 41 mm.

Technical details

Mechanical Movement

- *The information on the mechanical movement corresponds to the current production situation in Frankfurt am Main. Due to technical changes, it may happen in individual cases that stock items of our sales partners deviate from this information. ([further information](#))*

- Concepto C99001
- Self-winding mechanism
- 25 bearing jewels
- 28,800 semi-oscillations per hour
- Seconds stop function
- Anti-magnetic as per DIN 8309

Case

- Case made of stainless steel, polished / satinized
- Sapphire crystal glass in front, anti-reflective on both sides
- Transparent case back made of sapphire crystal glass, anti-reflective on the interior
- Case back screw-fastened
- Crown screwable
- Meet the technical requirements for waterproofness, as set out in standard DIN 8310
- Waterproof and pressure-resistant to 300 m diving depth (= 30 bar), certified by DNV
- According to the technical demands for the diving norm DIN 8306
- Tested based on European diving equipment standards EN 250 / EN14143 and certified by DNV
- Low pressure resistant

Functions

- Hours, minutes, subsidiary seconds
- Date display
- Day of the week display
- Chronograph
- Diver's bezel with minute ratcheting and luminous key mark

SINN Technologies

- Ar-Dehumidifying Technology enhances functional reliability and freedom from fogging
- Temperature resistance technology, therefore functionally reliable at temperatures from -45 °C up to +80°C
- Push-pieces with D3-System
- Captive bezel

Dimensions and Weight

- Case diameter: 43 mm
- Band lug width: 22 mm
- Case thickness: 17 mm
- Weight without strap: 95 gramme

Dial and Hands

- Electroplated blue dial with sunburst decoration
- Indices coated with luminescent colour
- Hour, minute and second hand coated with luminescent colour
