

344 Ti Aut

The ladies' sports watch.

- Case made of titanium, bead-blasted
- Sapphire crystal glass
- Pressure-resistant to 10 bar
- Low pressure resistant

Our model 344 is a ladies' watch with a very special character. On the one hand, it's as functional and technologically sophisticated as you would rightly expect of a Sinn timepiece. And on the other hand, it has a formal elegance that simultaneously signals the restraint and esthetic taste of the wearer. A performance distinguished primarily by the slim case in lightweight yet solid titanium. The dial: punctiform, intensely luminous 12-hour indices as well as the hour and minute hands are coated with long-lasting special luminous paint. The red second hand with a matte black center provides an effective contrast and is clearly readable – during everyday use, sports activities and any other situation. We didn't practice any restraint whatsoever with regard to the technical features of the 344: its core is formed by an ETA 2678 movement with 25 ruby bearing jewels and 28,800 alternations per hour. It is equipped with a screw-fastened case back, screwable crown and a sapphire crystal glass with anti-reflective coating on both sides. You'll find the most important information about the watch engraved in the case back – it is shock-resistant, water-resistant and pressure-resistant to 10 bar (100 m). Titanium offers outstanding comfort and wearability. It is completely anti-allergenic, adapts better to the wearer's arm temperature, is fully anti-magnetic and significantly lighter than stainless steel.

Technical details

Mechanical Movement

- ETA 2678
- Self-winding mechanism
- 25 bearing jewels
- 28,800 semi-oscillations per hour
- Seconds stop function
- Shock resistant as per DIN ISO 1413
