Continuing the tradition of our Frankfurt Financial District Watches, the Frankfurt 6060 M World Time Watch can display different time zones. It features two time zones with a 12-hour display and one time zone with a 24-hour display. It occupies a special place in the series of Frankfurt Financial District Watches thanks to a unique characteristic - the beautifully shimmering brown dial. This, in combination with the appliques coated with luminous paint, gives the 6060 M an especially elegant appearance. The link to Germany's financial centre is established by a finely handcrafted engraving on the rotor. This depicts the internationally familiar "bull and bear" symbols. They can be seen through the transparent case back made of sapphire crystal glass, as can the limited edition number. The movement of the 6060 M is exquisitely decorated, with Geneva stripes and blued screws completing the picture.
