Low pressure resistant

Make a statement – with colour and style: With the new watches in the popular 556 series, we're setting fresh accents. Sand, Ice Blue, Mauve and Sage – four pastel tones that boldly express individuality, all within a distinctive design language that makes no compromises on functionality.

Particular attention is given to the finely executed guilloché dials. They lend each timepiece a unique texture, surprising depth, and subtle sophistication. When combined with each colour tone, they create a dynamic visual experience of their own. The result is an elegant character paired with a contemporary design that appeals equally to women and men.

From a technical perspective, these watches impress with water resistance and pressure resistance to 20 bar. They are also resistant to low pressure, making them reliable companions in everyday life. The hour and minute hands coated with luminous paint, along with hand-applied indices, ensure perfect readability even in the dark.

Each colour variant is limited to just 300 pieces – true collector's items and ideal for those who appreciate the blend of mechanical stability and vibrant aesthetics. Thanks to a wide range of strap options, every watch can be individually configured. A beautifully crafted timepiece thus becomes a true expression of personality – right on your wrist.
