Sapphire crystal glass

Low pressure resistant

The U200 B is an exclusive, limited edition watch. The mission timer made from German submarine steel is equipped with a matte blue galvanized dial and white, luminous indices and hands. Matching in colour, the watch comes with a white silicone strap and blue and white textile strap as standard. The U200 B is equipped with impressive technology, as the Ar-Dehumidifying Technology for functional reliability and freedom from fogging. Temperature resistance technology ensures that the U200 B is functionally reliable in a temperature range of -45°C to +80°C. Its suitability as a diving watch for professional usage was tested by Germanischer Lloyd. They confirmed and certified its pressure resistance up to a diving depth of 2,000 metres and temperature resistance and functioning in accordance with the European diving equipment standards.

U200 B (EZM 8) – Back view, side view. (Fig.: 1:1)

Germanischer Lloyd confirms and certifies the pressure resistance of our **U200 (EZM 8)** series to a diving depth of 2,000 m and the temperature resistance and function based on EN250 and EN14143, the European standards for diving equipment.
